## Dungeons & Dragons

### What is D&D?

Dungeons and Dragons is a fantasy, table top, role-playing game where characters create a story involving adventure and problem solving. The decisions that you make as a team will guide your characters through quests for treasure, battles with deadly foes, daring rescues, and much more.

### D&D is driven by your imagination.

D&D is a storytelling game where you are drawn into a world of sorcery and swords. It's about picturing a crumbling castle in a darkening forest and imagining how a fantasy adventurer might respond to the challenges that a particular scene presents. The story you tell is prompted through the role of a Dungeon Master but explored by the player

### Roles

When you play D&D, you take on the role of an adventurer of your own design: a skilled fighter, a devout cleric, a deadly rogue, a spellcasting wizard, or anything your imagination comes up with. There is a different focus each time the game is played, dependent on the group dynamics.

# Dungeons & Dragons

## Never played?

Not an issue!! Our DM and two trusty therapists will take the time to explain the rules and your roles in the game.

D&D encourages problem solving skills through use of group conversations. No two games are the same; scenarios and situations vary making this a unique experience for everyone.

## Dungeon Master

Step 2 have their very own DUNGEON MASTER to lead the group. The DM has a very important role to play; they are the lead storyteller and referee.

Before you can roll the dice to commence the game, you need to invent your own character; the DM will spend week 1 of the program on character development helping you to conjure up drawings and back stories of the character you have designed.

The DM guides the direction of the adventure and assists the players' characters to work as a team to navigate any adventure hazards and decide where to explore.
